

Session 1: Home Under the Sea
Organisms and Habitat Field Notes

Name of Organism	Location it was found	Qualitative (Five Senses)	Quantitative (number found)

Sketches of Habitat and Organisms	Questions for Later
--	----------------------------

Check for Understanding

- 1) Why does air stay inside Aquarius while the water stays out?

- 2) Why don't scientists swim up to the surface while they're living in Aquarius?

- 3) What animals live on or around the outside of the Aquarius lab?

- 4) In what ways does Aquarius benefit these animals?
